

BEHAVIORAL FUSION

AN INVESTIGATIVE DISCIPLINE FOR COMPLEX CRIMINAL CASES

4 DAY COURSE

HOSTED BY: Indiana State Police

November 16-19, 2026

Indianapolis Post
8620 E 21st Street
Indianapolis, IN 46219

8:00 AM – 5:00 PM Daily

COURSE OVERVIEW

This four-day class brings entirely new investigative concepts and best practices to law enforcement, highlighting early data investigations to the volume of evidence faced today. The evidence validation standards presented in this class are a new discipline and methodology designed to meet evolving laws, policies and rules surrounding digital evidence. Practitioners receive an entirely new language adapted to their digital workflow, providing profound clarity to their investigations.

Who Should Attend

Any investigator, supervisor, analyst or prosecutor who touches digital evidence should attend this course. Any officer who is being mentored for investigations, and any sworn law enforcement, analyst or attorney who receives a paycheck.

Participant Takeaways

This course identifies, names and provides process solutions for the mounting number of challenges digital evidence creates. Investigators, supervisors, and attorneys need a common language to navigate the digital shift. In addition to understanding silos of expertise and best practices for investigating and prosecuting artifact evidence, a practitioner's digital decisions must stand the judicial test of time.

Every active law enforcement officer and attorney will walk away from this class with knowledge of how complex evidence builds and breaks cases from the start of an investigation through the appeals process. They will advance their understanding of digital artifacts, validation processes, and why digital evidence is ascending physical evidence.
